

PRODUCT INFORMATION

SOLO SHOT™ FUEL NHANCER™

When a car's engine is running, the gasoline being burned is leaving behind harmful, power-robbing deposits inside the engine. If deposits are not properly controlled, they will cause a gradual loss of engine power, fuel economy, and drivability.

Because today's fuel systems work with clearances and tolerances that measure in microns (some less than half the thickness of a human hair) even the smallest deposits on these components can have a dramatic effect on engine performance and fuel mileage.

To meet the standards for fuel economy and emissions, fuel systems measure fuel more precisely than ever before. There's no room for error — or for deposits.

BENEFITS

NGEN Solo Shot™ Fuel Nhancer™ is a professional grade fuel system cleaner designed to remove deposits in a safe manner. The formula contains no alcohol and is safe for catalytic converters and oxygen sensors. Use Solo Shot™ Fuel Nhancer™ to keep your customers' fuel systems healthy, so they can stay ahead of severe carbon build-ups that require a more aggressive service.

One pour does more!™

DIRECTIONS

Pour entire contents of 1 bottle into gas tank. For best results, pour into a full tank. Use every oil change. 1 bottle treats up to 21 gallons.
