

PRODUCT INFORMATION

LIQUIFOG™

CARBON CRUSHER™ CLEANS DIRECT INJECTION VEHICLES

THE NEED

Harmful deposits that cause performance impairment issues like power loss, decreased mileage, failed emissions, hard starting, rough idling, and hesitation have long been a problem for vehicles owners. They can even shorten the life of an engine. Today's Gasoline Direct Injection (GDI) technology creates more deposits in hard to reach places.

THE SOLUTION

You can't solve today's problems with yesterday's chemicals.™ NGEN's LiquiFog™ is the answer! This proprietary formula unleashes a new, thermally stable Carbon Crusher™ with fogging action. This revolutionary GDI cleaner will safely and effectively clean deposits in just one tank of gas.

BENEFITS

- Improve fuel mileage
- Improve vehicle performance
- Prevent costly repairs
- Save money

DIRECTIONS

Apply 1 bottle to gas tank. For best results after application, it's recommended to drive with a full tank of gas. Must have at least ¼ of a tank of gas prior to application. 1 bottle treats up to 21 gallons at maximum effectiveness.
